

AirPro Green®

NOTHING MORE THAN PAPER AND AIR

THE BUBBLE MAILER WITHOUT PLASTIC FILM

AirPro Green is the strong bubble mailer which does not require any bubble film to be protective. Paper bubbles do the job!

Embossed paper inside the bag forms a strong cushioning layer that protects pressure-sensitive contents from impact. Completely without bubble film, this cushioned mailer scores with its choice of materials, strength, and lightness!

THE STRONG BUBBLE MAILER - MADE FROM PAPER AND AIR

AirPro Green stands for strength, lightness and a smart choice of materials. Padded with embossed paper bubbles, this cushioned mailer is the alternative to conventional bubble bags with bubble film.

AirPro Green is made from FSC®-certified paper, utilizing the strength of embossed paper. In a complex process, the middle paper layer is provided with a stable bubble pattern. A total of 3 paper layers protects the shipping goods from external pressure.

The low weight and volume of the **AirPro Green** mailer also helps to send efficiently and economically. The recipient benefits from the simple disposal and the recyclability in the wastepaper stream. This paper bubble mailer is ideal for senders who value protective and at the same time paper-based shipping packaging!

The mark of responsible forestry

PAPER BUBBLE MAILER
